

# Axway eInvoice

## Secure electronic invoice exchange and archiving

Even with the availability of today's electronic data exchange technologies, many businesses still exchange billions of paper invoices each year. Paper invoice processes inherently generate unnecessary costs, take more time, and cause errors associated with manual processing. Electronic invoice processes are far more efficient and secure, freeing up resources to focus on more significant business activities.

Axway eInvoice helps eliminate inefficient manual processes by transmitting your invoices and associated documents electronically and securely. Axway eInvoice adheres to country-specific regulatory requirements and uses all standard communication protocols, including optional encryption, so that you may exchange compliant electronic invoices with your business partners.

Key Features & Benefits	
<p><b>Secure electronic invoice transmission</b> Do away with paper invoices for lower postage, printing and processing costs, fewer invoicing mistakes and built-in security features.</p>	<ul style="list-style-type: none"> <li>▪ Send invoices electronically to every partner in your ecosystem, eliminating inefficient manual processing and improving speed and accuracy of transmissions.</li> <li>▪ Protects data transmission, data integrity, authenticity, and undisputed origin of data.</li> <li>▪ Signs and/or validates all invoices at the envelope level using a secure signature unit.</li> </ul>
<p><b>Retrieval and archiving</b> eInvoice ends the paper search with automatic electronic archiving of invoices and related documents. Find and retrieve archived invoices easily, within seconds.</p>	<ul style="list-style-type: none"> <li>▪ Retrieve invoices based on a range of attributes using the eInvoice index. Easily search and find invoices via convenient Web-based interface and link to the write-once-read-many (WORM) archive.</li> <li>▪ Envelope manager transfers data needed for invoice archiving to the integrated archive system. Ensures proper archiving with a built-in checking mechanism.</li> <li>▪ Accurate and appropriate archiving and retrieval capabilities ensure compliance with country-specific tax regulations.</li> </ul>

**Key Features & Benefits****Reduced risk**

Tax audits are easier to survive intact when you have information at your fingertips. eInvoice security, archiving and retrieval features lower the risks to your business and your trading partners.

- Comply with relevant country-specific regulations and various EU directives covering data formats, data content, archiving and other pertinent requirements for each country.
- Provide auditors with all necessary data to demonstrate full compliance.
- Comply with country-specific regulatory mandates (such as SEPA) that require audit of transfers, security and access.
- Use any standard communication protocol, including optional encryption, to exchange compliant electronic invoices with your business partners.

**Convenience and automation**

eInvoice provides the convenience of electronic invoice transmission and gives organizations automation capabilities to improve speed and quality of service.

- Automation of invoice processing reduces costs and time expenditures, and avoids missed or late payments due to processing time.
- Automatically post and import data into ERP for greater efficiencies and reduced error rates.
- Conveniently share invoices with any partner using any standard communication protocol.
- Deploy eInvoice in a Software-as-a-Service (SaaS) model – Axway takes care of the management and maintenance so you can concentrate on your business.

**System Specifications****Platforms**

IBM RS/6000® (AIX 6 + 7)  
 HP Integrity (Itanium®, HP-UX Version 11i v3)  
 Sun SPARC (Solaris 10.0)  
 Red Hat Enterprise Linux ES 5 64 Bit (Intel x86)  
 SUSE LINUX Enterprise Server 11 (SLES 11) 64 Bit (Intel x86)  
 MS® Windows® 2008 Server R2 (Intel x86)

**Databases**

Oracle 10g R2 (Version 10.2.0.3.0)  
 / 11g R1 (Version 11.1.0.6.0)  
 Synchrony Database 4.4

**Delivery Options**

Licensed software  
 SaaS

**Electronic, secure invoice transmission**

Axway eInvoice enables electronic invoice exchange with your customers and trading partners, eliminating the expense involved with other means of processing and delivery, while improving security and speed of service. eInvoice works in concert with your other B2B solutions to improve compliance with government and industry regulations, and insulate you from relevant tax laws. eInvoice protects data integrity and guarantees authentication and confidentiality, adhering to country-specific regulatory requirements and industry guidelines.

**Envelope manager**

A key component within the Axway eInvoice solution, Envelope Manager:

- Bundles and splits ingoing and outgoing messages
- Signs and/or validates all invoices at the envelope level using a secure signature unit
- Converts received messages into the desired target format and transfers them to their target application via a range of application interfaces
- Transfers all information needed for invoice archiving to the integrated archive system

**Retrieval and archiving**

Eliminating paper from your invoicing process with Axway eInvoice not only reduces waste and expense, it also relieves you of the burden of physically storing and retrieving these documents. eInvoice's retrieval and archiving capabilities:

- Automatically archive invoices subject to parameters you set
- Create a retrieval index based on various invoice attributes
- Enable you to easily search and retrieve invoices and/or provide a link to the WORM archive
- Provides a convenient Web-based interface for retrieval
